Boston Family Wins \$15,000 Home Comfort Makeover

TYLER, Texas (January 7, 2009) — Not only is Donna Cohen's Pembroke, Mass. home more comfortable, but her family will be breathing easier thanks to an American Standard Heating & Air Conditioning home comfort online giveaway. As the giveaway winner, Cohen received a new heating and cooling system including an American Standard AccuClean whole-home air filtration system, which was installed in December 2008 by independent contractor Comfort Air Systems of Framingham, Mass., with support from authorized distributor S.G. Torrice.

"We were beyond thrilled to win the American Standard Heating & Air Conditioning home comfort makeover," said Cohen. "The folks from Comfort Air were true professionals who took the time to make sure everything was done right, and we were very happy with the entire installation process."

The online giveaway was a part of American Standard Heating & Air Conditioning's first-ever, word-of-mouth campaign that targeted moms in the Boston area. Moms were invited to visit a special Web site (<http://www.momcentral.com/american-standard-heating-air-conditioning/american-standard-heating-air-conditioning/>) to learn more about combating asthma and allergies and flu prevention, among other topics. The site also boasted home comfort tips from lifestyle expert, TotalMom.com founder and American Standard Heating & Air Conditioning spokesperson Hannah Keeley and an online chat room for local moms to share and discuss their own home comfort solutions.

Cohen was selected at random, among all the moms who registered online for the home comfort giveaway, to receive the grand prize that included \$15,000 worth of American

Press Release

Standard Heating & Air Conditioning equipment and installation from Comfort Air Systems.

The giveaway was designed to help Boston-area families make their homes cleaner and more comfortable. Part of the solution is the American Standard AccuClean whole-home air filtration system, which removes up to 99.98 percent of the dirt, dust, pet dander and pollen from the filtered air inside a home.

About American Standard Heating and Air Conditioning

Trane, a wholly owned subsidiary of Ingersoll Rand (NYSE: IR), provides systems and services that enhance the quality and comfort of air in homes and buildings around the world. Through its two premium brands – Trane and American Standard Heating & Air Conditioning – the business offers a broad range of energy-efficient heating, ventilation and air conditioning solutions. Its systems and services comprise dehumidifying and air cleaning products; aftermarket service and parts support; advanced building controls; and building and financing solutions, including those that allow energy-efficient systems to pay for themselves through energy savings. Trane's systems and services have leading positions in premium commercial, residential, institutional and industrial markets; a reputation for reliability, high quality and product innovation; and a powerful distribution network. The business has 35 plants in 10 countries and more than 29,000 employees worldwide. For more information, visit www.trane.com; www.americanstandardair.com; and www.ingersollrand.com.
