

Manufacturer's Tax Credit Certificate - Tax Payer Relief Act of 2012

The Tax Payer Relief Act of 2012 (25C) provides tax credits for the installation of Qualified Energy Property for residential heating and cooling equipment. American Standard Heating and Air Conditioning certifies that the products or system families listed below include models that meet the efficiency requirements according to AHRI's rating system when installed as part of a matched system, and may be eligible for the Tax Payer Relief Act of 2012 if placed in service from January 1, 2012 through December 31, 2016. Confirm eligibility of your matched system by visiting www.ahridirectory.org or by contacting your installing dealer.

Manufacturer: American Standard Heating & Air Conditioning, 6200 Troup Highway, Tyler, TX 75707

Class of Qualified Energy Property: Residential heating and cooling equipment, including: central air conditioners, air source heat pumps, gas furnaces, oil furnaces, propane furnaces, and gas/oil/propane furnaces with advanced circulating fans.

Note: These product families contain model system combinations that meet 25C requirements, however not all system combinations may qualify. Visit www.ahridirectory.org to obtain an AHRI certificate with your system combination's exact efficiency rating, or contact your installing dealer.

Other Important Homeowner Information

There are other important requirements and limitations to qualify for the tax credits under the Tax Payer Relief Act of 2012 such as the qualified energy property must be installed in the homeowner's primary residence. American Standard recommends that homeowners consult a tax professional to ensure they meet all requirements. The Internal Revenue Service is responsible for implementing and administering the tax credits.

Under penalty of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts presented are true, correct, and complete.
