ARO Showcases New Pump and Control Technologies at ACHEMA World Forum 2015

Visit stand E18 in Hall 9 of the ACHEMA 2015 show in Frankfurt, Germany to learn about the latest innovations in fluid handling and see how ARO makes success flow...

Davidson, N.C., May 11, 2015 - Ingersoll Rand, a global leader in compressed air and gas systems and services, power tools and fluid and material handling equipment, will showcase its latest ARO® fluid management pump and pump control technologies at the ACHEMA World Forum 2015 in Frankfurt, Germany, from June 15-19, 2015.

ARO’s fluid intelligence experts and leadership team will be available to media and visitors to provide information on the latest innovations and solutions from the company’s portfolio of air-operated diaphragm pumps, piston pumps and systems, powder pumps and control devices. New products will also be introduced at the show. “It has been a remarkable year for ARO. We’ve introduced new products and we celebrated our 85th year of developing products that deliver reliable performance and serviceability for lowest total cost of ownership, which is what our customers look for,” said Donny Simmons, President of Ingersoll Rand Fluid Management and Material Handling. “We’re looking forward to sharing our latest products and expertise with visitors at the ACHEMA World Forum.”

ACHEMA attendees are invited to visit the ARO booth Hall 9, stall E18, to experience the following products on display at the show:

- The ARO Controller is the world’s first closed-loop controller for air-operated diaphragm pumps that delivers on touch-and-walk-away automation. The dual-pump Controller features remote triggers that can perform auto shutdowns and display critical operating data and service alerts to operators via a control-panel display. When paired with an ARO EXP Series Electronic Interface pump, the Controller provides an automated system for batching and container and tank filling with plus or minus one percent repeatability.

- Pumps from the line of EXP Series Electronic Interface pumps will include the one-fourth- through three-inch air-operated diaphragm pumps. These units are known for their industry-leading efficiency, reliability and value based on their low total cost of ownership and controllability. EXP Series pumps offer flow rates up to 1041 LPM (275 GPM) within a large range of materials of construction and porting configurations.

- The ARO two-inch powder pump helps operators replace manual powder processes with a highly reliable transfer process that reduces airborne contamination and powder “pack-out.” Simplicity and portability are hallmarks of the pump, and features such as a patented stall-free major air valve and a four-way efficiency valve make it a performance powerhouse.

Executive interviews are available upon request. Follow ARO on Twitter @AROPumps or on YouTube at Aro Pumps/Ingersoll Rand
About Ingersoll Rand
Ingersoll Rand (NYSE:IR) advances the quality of life by creating comfortable, sustainable and efficient environments. Our people and our family of brands — including Club Car®, Ingersoll Rand®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings; transport and protect food and perishables; and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material and fluid handling systems. The diverse and innovative products, services and solutions enhance our customers’ energy efficiency, productivity and operations. We are a $13 billion global business committed to a world of sustainable progress and enduring results. For more information, visit www.ingersollrand.com or www.ingersollrandproducts.com.

ARO Makes Success Flow
ARO is a leading worldwide manufacturer of fluid handling products expertly engineered to deliver performance and serviceability, enabling customers to achieve the best total cost of ownership. For 85 years ARO has been helping customers solve their most complex fluid handling challenges to keep their business moving. For more information about ARO, visit www.AROzone.com.

About ACHEMA 2015
Organized triennially, with 170,000 attendees from more than 100 countries and 3,800 exhibitors ACHEMA is the world’s most comprehensive - and most inspiring event for the chemical process industries. Visitors will find the opportunity to discover the latest innovations in Business, Materials, Advanced Materials, Composites, Biotechnology, Chemistry, Environmental Protection, Laboratory, Measurement, Instrumentation and Quality Assurance.
