YOUR CHOICE FOR GREATER QUALITY AND GREATER COMFORT.

At American Standard Heating & Air Conditioning, your expectations for comfort are only exceeded by ours. Our industry-leading Comfort Coil is just one more example of that. By teaming with your air conditioner or heat pump compressor and furnace blower as part of a matched system, our all-aluminum Coil can help provide the highest level of performance and comfort.

It works by first receiving refrigerant from the air conditioner or heat pump compressor. The Comfort Coil then allows the heat in the indoor air to be “exchanged” for cooler air. Meanwhile, the blower in your furnace circulates the cool air into your home, while the heat is released to the outdoors. The result? Rust and corrosion are prevented and comfort, efficiency and dependability are improved.

Tested to meet the highest standards... ours and yours.

At American Standard Heating & Air Conditioning, we back our tradition of innovation with a commitment to ensuring that each of our all-aluminum coils is up to the test before it ever reaches your home. That's why they're subjected to rigorous testing as part of a matched system to guarantee that your investment brings you the optimal level of performance, durability and comfort, year after year.

Copper tube and galvanized steel tube sheet after 500 hours in a controlled corrosive environment.

Aluminum tube and tube sheet after 500 hours in a controlled corrosive environment.

- 1 Aluminum tubes and tube sheets
Industry-leading design that delivers added durability through its corrosion and rust resistance.
- 2 Aluminum fins
Manufactured from a different grade of aluminum alloy that resists corrosion for enhanced durability even under the harshest conditions.
- 3 Foil insulation
100% foil-backed insulation makes cleaning a snap and helps reduce service time.
- 4 Two-way, non-corrosive drain pan
Reduces standing water, which can lead to the growth of mold, mildew and bacteria.
- 5 Prepainted inner coil panels
Provides greater corrosion resistance and easier access for cleaning. Regular cleaning helps improve efficiency, system life and indoor air quality.

- 6 Painted finish
Adds increased protection from rust and corrosion.

Maximize your comfort zone. Just like customizing a car, you can further enhance your system's performance with options to make your home environment ideal.

- 1 **Comfort Control**
With programmable or non-programmable options available, American Standard controls are smart, clear and intuitive.

- 2 **AccuClean™**
The ultimate in whole-home air filtration, AccuClean removes up to an incredible 99.98% of particles down to .1 micron from the filtered air.

- 3 **Humidifier**
Prevents dryness that can cause damage to you and your belongings. Also reduces static electricity.

Designed for comfort. Built to last.

For more than a century, families have trusted American Standard Heating & Air Conditioning to keep their homes comfortable. Today, our home comfort systems continue to push the boundaries of efficiency and performance, while still delivering on our proud history of quality, durability and substantial value. Welcome your family home to a higher standard of comfort. From American Standard Heating & Air Conditioning.

Take comfort to an even higher level.

Ready for the cleanest possible indoor air? The AccuClean™ Whole-Home Air Filtration System removes up to an astounding 99.98% of allergens from filtered air, capturing particles down to .1 micron. In fact, AccuClean™ is 100 times more effective than a standard 1" throwaway filter or ionic-type room appliance, so you know you're getting a home air filtration system like no other. Ask your independent American Standard Heating & Air Conditioning dealer for details.

Our dealers will put you in your comfort zone.

Your independent American Standard Heating & Air Conditioning dealer is a highly trained professional with years of experience who'll work with you every step of the way in choosing the system that's right for you – from walking you through the entire purchasing process to conducting an in-depth analysis of your home and your comfort needs. Based on that information, your dealer will recommend a system that works best for your home. After all, the more efficient the system, the more comfortable you'll be.
